

Testimonials:

Lynne Lewis (Mer-Lyn Farms, Holstein, Ontario, Canada)

"Fulfilling a lifelong dream, I purchased the first Knekt Electric Tractor in North America.

I put it right to work running our 10 inch auger up to the grain bin. I am quite pleased.

It worked flawlessly. It took 12 loads (20 minutes per load) before needing a recharge.

I've cut grass in the field inside our solar compound; which is why I bought the electric tractor. It worked great.

I'm thrilled."
